☎ Phone: +201114182043 📍 Address: Cairo, Egypt

🌐 [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Summary

ASP.NET Back-End Developer and final-year Software Engineering student with hands-on experience building scalable applications using C#, ASP.NET Core, RESTful APIs, Entity Framework Core, and SQL Server. Strong knowledge of OOP, SOLID principles, design patterns, authentication, authorization, and clean architecture. Developed strong problem-solving skills through ECPC participation and technical training at Route Academy, with a passion for building reliable systems and writing clean, maintainable code.

Education

Faculty of Computers and Artificial Intelligence, Cairo University 4th Year Student	2022-2026
— Expected Graduation: 2026 Gpa : 2.9	Cairo, Egypt

Courses

Frontend Angular Developer Training — Digital Egypt Pioneers Program

Nov 2024 – May 2025

Developed modern SPAs using Angular and TypeScript through real-world project practices.

Backend .NET Developer Training — Route Academy April 2025 – Nov 2025

Hands-on training in backend development using .NET Core, C#, APIs, and MVC architecture.

Technical Skills

Backend Development:

C#, OOP, ASP.NET Core, .NET MVC, REST APIs, SignalR, Socket Programming, Java EE Fundamentals

Database & ORM:

SQL Server, Entity Framework Core, LINQ, ADO.NET

Architecture & Design:

SOLID Principles, Design Patterns (Dependency Injection, Unit of Work), Clean Architecture, Distributed Caching

DevOps & Tools:

Git, GitHub, GitHub Actions, Docker (Basics), CI/CD (Basics)

Core Concepts :

Problem Solving with c++, Data Structures, Algorithms, Agile Methodologies (JIRA)

Soft Skills

- Teamwork and Collaboration
- Communication and Presentation Skills
- Time Management
- Problem-Solving and Adaptability
- Continuous Learning

Achievements

- Participated in ECPC 2024, strengthening algorithmic and problem-solving skills.
- Completed Problem Solving with C++ training at Coach Academy.
- Participated in entrepreneurship and teamwork projects, developing collaboration and leadership skills.

Projects

1: Gym Management System (MVC) | ASP.NET MVC (.NET 9) Sep 2025 – Oct 2025

Built a full-featured gym management system for memberships, subscriptions, attendance, payments, and admin operations using ASP.NET MVC, EF Core, SQL Server, authentication, role-based authorization, Unit of Work, AutoMapper, and SOLID principles.

Live Demo: <https://gymmanagmentapp.runasp.net/>

GitHub: <https://github.com/MohamedSob7y/GymMangmentSystem>

2: On-Demand Home Services Marketplace | Java, Spring Boot, Jakarta EE, EJB, RabbitMQ, MySQL, Docker

- Built a microservices-based backend for booking home service professionals.
- Implemented separate User, Catalog, Booking, and Notification services with independent MySQL databases.
- Developed Booking Service using Jakarta EE/EJB and integrated RabbitMQ for asynchronous notifications.
- Implemented wallet validation, payment deduction, booking history, provider offers, and user-specific notifications.
- Tested all REST APIs using Postman and Dockerized MySQL containers.
